Meiji Yasuda Selected as an “A List” Company, the Highest Rating in the CDP's Climate Change Assessment for the third consecutive year

Meiji Yasuda Life Insurance Company (Hideki Nagashima, President and Group CEO) would like to announce that we have been selected to be an “A List” company by CDP* which is an international environmental NGO, recognizing our achievements and information disclosure on climate change for the third consecutive year.

We have been promoting the reduction of CO2 emissions through various initiatives such as increasing the introduction rate of renewable energy, promoting energy conservation in our buildings, obtaining environmental certifications, promoting paperless operations and more efficient logistics. Additionally, as an institutional investor, we invest and finance in green loans using our unique framework as well as renewable energy generation projects, and we also actively promote decarbonization through engagement with investee companies, by setting “Decarbonization” as one of the priority themes for ESG investment and financing. We believe these achievements and information disclosure have been recognized and appreciated.

We will continue to contribute to the creation of a sustainable and hopeful society including the realization of a carbon-free society.

*CDP is an international environmental NGO that demands promoting efforts and disclosing information on environmental issues from companies. Visit the CDP's website for more information. <https://www.cdp.net/en>

● CDP's Climate Change Assessment

Every year, CDP selects the best companies with the commitments and information disclosure in the field of climate change for the "A List".

More than 24,800 organizations worldwide were subject to the CDP's Climate Change Assessment in 2025.

● Meiji Yasuda's roadmap to address climate change

To address climate change, we set a target of net-zero CO2 emissions to be achieved in FY2050 and an intermediate target to be achieved in FY2030, and formulated the “Roadmap for Net-zero CO2 Emissions” from the standpoint of both a business operator and an institutional investor. In line with this roadmap, we are promoting related initiatives.
